BUSY DAYS AT CRIPPLE CREEK

BIGGEST PAYROLLS ON RECORD; MILLS RUN THREE SHIFTS.

Active Winter Looked For All Through Colorado-Butte Coalition Co. Makes Almost Total Sautdown-Tintle Mines Pay Dividends-Mexican Camp News.

States Reduction and Refining Company is receiving 300 tons of Cripple Creek ores daily at its Union mill at Florence in order to relieve the Standard gauge roads and to enable the mines to ship to their full capacity. This mill has just been started up after a period of idleness. Reduced treatment rates made the restarting possible. The mill is run with three shifts and 175 men are employed.

Cripple Creek's payroll is the largest in its history. Saturday's bi-monthly payments were made in gold direct from the Denver mint, which contained \$45,000,000 when the stock panic in New York began. Upward of 1,000 tons of ore is being shipped daily. About an equal amount is being treated in the camp at various cyanide and other mills. The new thirty stamp mill of the Butterfly-Terrible Mining Company at Ophir Loop, fourteen miles from Telluride, will soon go into commission at full capacity of ninety tons daily. The Buckeye Milling and Leas-ing Company is operating the Butterfly-Terrible mine and mill on a five years lease

ore which it has uncovered or may hereafter uncover.

The Iowa & New Mexico Mining Company has a force of men at work developing its Turkey Creek properties. The ore showing is said to be very satisfactory.

The Parsons mine, situated near Capitan, is producing a large quantity of ore which is treated at the mili at the mine.

The Last Chance mine, situated in the Mogollon district, is now a steady producer of good ore. The gold builion shipments from this mine are brought overland to Silver City.

A company has been organized at Hagerman, N. M., for the purpose of taking over and developing a group of fifteen claims situated near Meck, in the Capitan Mountains.

MEXICO.

MEXICO CITY, Nov. 18.—The shaft of the San Luis Flores de Oro mine, situated in the Guanajuato district, which was recently leased by Ed Griffin and Jack Griffin from Braulio Acosta, has been unwatered and it is claimed that more than \$150,000 worth or ore is in sight. The ore in the vein, which is from four to ten feet wide, is said to run from 400 grams to 500 grams gold per ton.

The mines of the San Juan Mining Company in the Mapimi district, Durango, are producing large quantities of rich ore. The company recently declared a dividend of \$5 per share.

It is stated that the mines of the Perclas MEXICO.

ompany recently declared district, are now showing an increase of production and that the richness of the ores is also greater. This company recently paid a dividend of \$20 per share.

It is reported that the Guadalupe gold mine, situated in the Inde district of Durango, has been sold for \$1,250,000 cash to an American syndicate. It was owned by London, England, men.

syndicate. It was owned by London, England, men.
The final payment of \$600,000 on La Republica mine, situated near Minaca, State of Chihuahua, was recently made by J. J. Mundy

MINE PUMPS.

STATION AND SINKING MINING PUMPS.
THE SLOGAN OF THE CAMERON—
"CHARACTER THE GRANDEST THING."
Over 50,000 CAMERON pumps in daily satisfactory use all over the world give tangble proof of their merit and confirm the chaim for their superiority over all others. They are conceded to be the most durable, reliable and effective mining pumps on the market to day, and white often imitated are never equalled. For proof, inquire of any mining engineer for the latest oatalog "C" and prices, write any of our resident agents or direct to the

A. S. CAMERON STEAM PUMP WARP

chairman of the Rock Island-Frisco executive committees and a few St. Louis and New York men.

The Doloros and Juanchorrey mines, situated near Nieves, Zacatecas, have been sold by Ausencio Morelos of Zacetecas, to a syndicate of Mexicans. The new owners will develop the properties on a large scale.

An American syndicate, headed by A. E. Stilwell, recently purchased the San Rafael mines, situated near Zacatecas. It is reported that the mines will be operated on a big scale and that a smelting plant will also be established.

The Calera Mining Company is getting out large quantities of silver, lead and zinc ores from its mines at San Isidro, Chiuahua. It has installed a concentrating plant of 100 tons.

The mines of Compania Minera la Química y Anexas and of several other companies situated in the Sultepec district will soon be equipped with electric power which will be furnished by the Temascaltepec plant of the Sultepec Light and Power Company. This plant was placed in operation only recently and the demand for power by mining companies is so great that the equipment cannot be installed fast enough. It is expected that the cheapness of the new power as compared with fuel will result in many new mines being opened.

Nearly fourteen thousand tons of ore were

NEVADA.

NEVADA.

FARREL. Nov. 20.—A strike was made this week on the Seven Troughs Caesar ground that compares favorably with the find made a few weeks ago by prospectors employed by the Salt Lake and Nevada Exploration Company, which caused a rush to this part of Seven Troughs district. In the Caesar a twelve foot vein has been cut, which has been opened on its strike. The highest assay obtained is said to be \$6,000 and the lowest \$13. This vein has been opened by trenching for 800 feet and the strike kept secret during that time, so that the owners could complete a survey for patent. On the exploration company's ground a depth of only twelve feet has been attained, but in going this distance, according to the man in charge, forty-one sacks of high grade gold ore was sacked, which will run from \$1,000 to \$1,500 a ton. It is stated that the entire eight feet of the vein will average \$200 a ton.

Reno, Nov. 20.—Rawhide, which one month ago had seven tents, to-day has 280 tents and a population of more than 1,000. Fifty to 100 prospectors are arriving daily. The new businesses comprise ten saloons, two small stores, one meat market, six restaurants, five tent rooming places, one photographer and a small furnishing house. Six or eight leasing combinations are sacking ore worth from \$100 to \$500 a ton and new strikes are being reported regularly. In one lease a find of gold ore worth \$125 a pound is reported.

Goldfield, Nov. 20.—George Vickers, a successful operator of this place, has bought the controlling interest in the Stimler-Jagels group at Stimler for \$92,500. There are fourteen claims, on which thirty-three leases are at work. Five of them are sacking ore running from \$150 to \$1,000 a ton in gold and silver. Two holists are to be shipped from Goldfield and the company will sink two shafts.

shafts.
Eighteen inches of tellurides worth \$2,000 a ton have been found in the Daisy at Diamondville. The rich shoot was opened in a stope close to the Bjorne shaft on the 200 level.

and Robert Dorbant of El Paso, Tex., its purchasers. The new owners will develop the property on a large scale, it is said. It is now producing about \$300 worth of silver ore a day. Modern machinery is to be installed and the working force more than doubled.

The Corwin & Greene Consolidated Mining astrike of ore in the El Roble mine, situated on the Santa Ans River in the Guanajuato district. The ore runs as high as ten kilos silver and 300 grams gold, or about \$700 per ton. The principal stockholders of the company are Ed Greene of San Marcos, Tex., and J. C. Corwin of Guanajuato. The new ore body was struck by accident there being no surface indications of its existence. The mine is situated upon virgin ground.

The Lluvia de Oro gold-silver mine in the Urique district of Chihuahua is again producing large quantities of rich ore. The new mill at this mine is now in regular operation and forty bars of bullion, worth \$400,000 Mexican money, were recently shipped to the United States. It is owned by B. F. Yoakum, thairman of the Rock Island-Frisco executive committees and a few St. Louis and New York men.

The Doloros and Juanchorrey mines, situated the property has been stopped only at this property has been stopped only at this property has been stopped only at the Boston Consolidated at Bingham or exercised soon to resume at full force. Work at this property has been stopped only at the property has been stopped only at the property has been stopped only at the supplied shipping ores and shipments have been stopped only at the property has been stopped only at the Boston Consolidated at Bingham orders are expected soon to resume at full force. Work at this property has been stopped only at the supplied shipping ore property has been stopped only at the supplied shipping ore property has been stopped only at the supplied shipping ore sand shipments have been kept at 1,000 cacture. The owned has been continued with a greatly reduced force and the mill is handling the ore taken shove the sulphide shipping ore p

plant to handle 1,000 or 1,300 tons daily is under consideration.

WASHINGTON.

SKATTLE, Nov. 18.—A consolidation of several antimony properties on Gold Creek in the Methow has been effected. Wichita (Kan.), men hold the allied interests.

A new strike has been made on the Josephine. This property is on Squaw Creek, a tributary of the Methow. The strike exposed four feet of rich copper gold ore in the lower crosscut and was made while assessment work was being done on the property.

Work has begun again on the Winnipeg mine. The railroad is in operation. All of the mines on Belcher Mountain are busy.

The new plant on the Hidden Treausre near Twisp has been started and the mine is again in active operation. The new stamp mill on the property had a trial test last week and was accepted. A tramway has been installed to carry the ore from the mine to the mill and a compressor plant and air drills have been added to the equipment of the property. The property will be worked all winter.

Mining is at a standstill in the Republic district, and in fact that section is now less active than at any time since the Colville reservation was opened to mineral location.

Another rich strike has been made at the property of the United Copper Mining Company near Chewelah, Wash., where last week five feet of rich copper ore was opened up at the 400 foot level.

The strike was made in the drift which has followed the vein for 200 feet since the long crosscut opened up the ledge. The strike consists of five feet of copper ore that is almost pure chalcopyrite. The ledge is fifteen feet wide where the strike was made, the other ten feet of ore being of good quality.

A company of the comp

partners, until within the last two or three years.

MONTANA.

BUTTE, Nov. 20.—The Butte Coalition Company has stopped all work at its mines except development in the Rarus, where about 175 men are still employed. The only ore mined now is taken out in the course of development work. Work is going on at ten different places in the mine, and from four of them ore is obtained averaging about fifty tons per day. When the curtailment order went into effect several months ago the Coalition company was mining 1,860 tons per day. The company argues that it can best use its time and treasury in opening its ore bodies and blocking them out preparatory to a big output when the demand for copper is again normal. The Rarus shaft is being sunk deeper. It is now 2,000 feet deep. The lowest level in the mine is at that point and is known as the seventeenth level, from which the south vein has been crosscut, but no drifting on it has been done. On the sixteenth level the south vein has been driven on it, opening a splendid ore body, larger and of higher grade than on any of the upper levels. The company is also crosscutting for the north veins and is driving a crosscut into the Minnie Healey for the purpose of opening that property at greater depth. The Minnie Healey will eventually be mined through the Rarus and Tramway shafts. The new Tramway shaft has reached the 1,100 foot level, from which a raise has been made for several hundred feet, but the shaft has not been enlarged and timbered all the way. The Coalition company is opening great bodies of ore in the Rarus and Minnie Healey, and when the demand for copper becomes normal again the company will be able to mine almost unlimited quantities of ore. The trouble in the past has been that it could not mine fast enough because of the limited amount of development work that had been done.

It has been persistently reported among the miners that the Parrot has made a con-

not mine fast enough because of the limited amount of development work that had been a top have been found in the Daisy at Dia a stope close to the Bjorne shaft on the 200 level.

TAS.

SALT LAKE, Nov. 20.—Five Tintic mines have deed, \$30,000; May Day, \$12,000; Uncle start, \$10,000. Manmoth reentered the dividend list in October after a year's absence with a distribution of \$20,000. Colorado Mining, \$80,000; Colorado Mining, \$80,0

The control of Property of Pro

The Mount Royal Mining Reduction Company is the name of the new corporation, organized under the laws of South Dakota, for the operation of the Bonner group of mines in Granite county. The company's headquarters will be in New York. The chief mine of the Bonner group is said to be eight miles from Phillipsburg and contains eight large true fissure veins ranging up to 12 feet between walls, which carry high values in silver, copper and gold.

IN THE BLACK HILLS.

DEADWOOD, S. D., Nov. 16.—President F. E. Little of the Minnesota Mines Company is here from Minneapolis for an inspection of the property near Maitland. The company expects to get its new 200 ton mill in operation some time within the next thirty days. The machinery is all here and the mill building completed with the exception of some minor details. As soon as the pumpe are set the shaft will be unwatered and sinking from the 185 foot level will start again.

Although it covers a period ending last June, the annual report of Supt. T. J. Grier of the Homestake Mining Company has just been received by the stockholders. The entire receipts for the twelve months included in the report were nearly \$5,000,000, of which 34,541,996 was from builtion. The company treated 1,264,177 tons of ore, which realized an average value of \$3.50. In expenses, labor hire was \$1,508,069.38, the coal bill for mines, mills and other plants \$73,497.02, while replacing old and worn out machinery cost \$287,303.97. In addition to this the cost of the big slime plant in Deadwood, \$305,421.64, was charged up in the expense account. Taxes in this county were \$115,520.02. Candles for miners came to \$18,161.41 and powder to more than \$170,000.

From the profits the company paid out \$108,000 monthly in dividends until last April, when these were suspended on account of the mine fire, but it is expected that they will be resumed before the first of the coming year. The Homestake is to-day treating its regular 4,000 tons of ore a day, all of the 1,000 stamps being in use.
